Level II.5 Day Treatment	0	0
Level III.7 Inpatient Treatment	4	1
Level 111.7 Dual Diagnoses Programming	0	0
Total	390	100

116 of the youth receiving chemical dependency treatment needs assessments did not meet the DSM IV criteria for a substance use disorder and/or did not meet ASAM Patient Placement Criteria for any level of services.

8 of the youth receiving chemical dependency treatment needs assessments did not meet the DSM IV criteria for a substance use disorder and did not meet the ASAM Patient Placement Criteria for any level of services, but did raise concerns that would place the youth in an at-risk category and were therefore recommended to receive drug and alcohol Prevention Education services.

262 of the youth receiving chemical dependency treatment needs assessments were ultimately referred to Level I Outpatient Aftercare Services. The majority of these youth received II.1 Intensive Outpatient Treatment while in STAR Academy, successfully completed, and then were referred to Aftercare in the communities.

4 youth were referred to Level III.7 Medically Monitored Intensive Inpatient Treatment. At Admission, these youth received a chemical dependency treatment needs assessment and were referred to level Level III.7 following completion of STAR Academy programming.
